

Figure 2-22
Mile 41 Picacho and NMGF

A privately-owned tract of land on the west side of the river near mile 41.5 has been identified by SWEC as the potential site of a Bosque Park. The presence of an old channel through the tract is evident from vegetation and from historical maps. Undeveloped land south of this tract, owned by New Mexico Game and Fish, is a project planned for bosque enhancement (Picacho Wetlands Project).

Integrated USIBWC Land Management Alternative

<i>Point Project Measures</i>	ID	#	Area (ac)
Native vegetation planting	41A	3	71.3

Targeted River Restoration Alternative

<i>Point Project Measures</i>	ID	#	Area (ac)
